Sample Essay on Economic Implications of Gender Inequality

Gender inequality is a core factor affecting global economy. Economic growth and gender equality at all times go together. Whenever gender discrimination is practiced regardless of the situation, field or individual involved, it suppresses growth of individuals, evolution of societies and development of nations. Gender inequality is a vice that has been around for many years and it is wise to find out better ways on how to wipe it out. Evidently, to improve economy in a nation or society in general it all starts by treating each other equally.

Gender inequality is an issue that affects both men and women, but it is profound in cases that involve women participation. Discrimination against women remains a disturbing issue to eradicate in the society as it hinders prosperity in the social-economic context. Empowerment of women through promotion of their rights and increase in the access to vital resources and education is a great strategy towards societal economic growth and development.

Whenever women are allowed to participate in the workforce, there are no economic resources wasted as production increases than when more women are in the working sector. This means that wage-gap disparity, lack of proper education and training should be looked into in a better manner. In a sense, more girls should be enrolled in primary schools and received the best professional training and get employed in large numbers. When women are able to access resources necessary to start and develop business, it becomes easier to contribute to the economy same as men.

Women many times are victims of discrimination when it comes to divorce, land laws and inheritance. Societies rob women and girl valuable resources and capital that they could use and start their business or any other venture that can bring income and revenue to
